

GREEN JOURNEY

What you need to know

Green Journey is our **energy scheme dedicated to providing churches with clean, green energy** in order to reduce their overall carbon emissions.

Over 250

churches are part of Green Journey in our Diocese

What does Green Journey do?

Green Journey works closely with churches to put them on **competitive carbon neutral gas and 100% renewable electricity contracts**. The contracts offered are fixed term baskets contracts which all have the same end date.

Green Journey offers a **complementary energy and sustainability survey** of churches and surrounding church buildings, providing a comprehensive report that will detail where energy is being used most, and offer recommendations of how to monitor, manage, reduce consumption, save energy and cut back costs.

How do you benefit?

The team at Green Journey will not only **provide renewable energy quotes** and **offer guidance and assistance on carbon reduction**, but will also help **take on the administrative burden** of energy management, so **churches can focus on their mission and ministry**. Green Journey provides a highly personal service where meeting churches' individual needs is of the utmost importance.
