

Study Courses on Christian Care for Creation

There are a variety of bible study resources available on the theme of caring for creation, protecting the environment and a biblical response to climate change. Some have a practical emphasis giving plenty of opportunities for your group to respond to the Word, while others focus more on the theology of our stewardship of creation or Christ's renewal of all the earth. You will need to discern which would be most appropriate for your group(s). While each is written with groups in mind, they could also be used for personal study.
